SUMMARY

Full-Stack Developer and B.Tech Computer Science student with a track record of shipping real-world products — including a computer-vision OMR scanning application deployed and sold to two educational institutions. Skilled across the front end (HTML5, CSS3, JavaScript, React.js) and the back end (Python, databases, REST APIs), with a strong drive to turn ideas into deployed, revenue-generating software.

PROJECTS

OMR Scanner & Mark Report System

★ Deployed · ₹40,000 revenue

Python · OpenCV · MySQL / MongoDB · Desktop & Mobile App

- Built a **real-time application that scans JEE & EAMCET OMR answer sheets** using OpenCV-based bubble detection and automatically generates detailed, accurate mark reports.
- Independently deployed and sold the product to 2 institutions as an entrepreneur**, earning ₹20,000 from each (₹40,000 total).
- Designed the data layer to store students, responses, and scores, producing per-student and consolidated performance reports.
- Recognized with a **Certificate of Appreciation from Nakshatra IIT-JEE Academy** for technical expertise and professionalism.

Responsive Website Builds (add details)

HTML5 · CSS3 · JavaScript · React.js

- Recreated and customized several modern, responsive websites to master layout, UI design, and front-end best practices. *(Replace with your specific clones/projects — e.g. names + live links.)*

ACHIEVEMENTS

- Entrepreneurship:** Built and sold an original software product to two colleges while still a student.
- Certificate of Appreciation from Nakshatra IIT-JEE Academy for the OMR application.
- Multiple medals in chess tournaments.
- Selected as a district-level Kabaddi player representing the school.
